

Connecting People, Process, and Technology to Improve Patient Care

Donn Wurts
Healthcare Practice, Managing Principal
Nexus IS, Inc.

Donn Wurts is the Managing Practice Principal for Healthcare at Nexus, where he is responsible for setting and directing the national product strategy for the healthcare solutions and services that Nexus delivers to its customers. Wurts focuses on improving healthcare workers' efficiency and effectiveness through the use of Advanced Technology, so patients have a better healthcare experience.

With 25 years of experience in the information technology fields, Wurts has a successful history of delivering large-scale transformational systems in Healthcare and International Manufacturing. His experience and ability to drive clinical conversations helps healthcare organizations by connecting their clinical and business goals to relevant technology offerings.

Wurts has significant experience in the Healthcare industry, including leadership positions at Kaiser Permanente, State Healthcare Services, Cisco Life Connections, Nexus and Swagelok. He has participated in executive advisory councils with Citrix Systems, Fujitsu Healthcare, Intel Healthcare Mobility, Dell Healthcare, HP, and Microsoft.

Wurts earned a Bachelor of Science in Computer and Information Science at Cleveland State University and is an active member of the Healthcare Information and Management Systems Society (HIMSS).
