

Nexus Core Foundation Services for Healthcare

Healthcare organizations have unique and challenging business requirements in today's marketplace. Infrastructure and core solutions must be secure, highly available, and resilient to meet compliance requirements, care practitioner, and customer expectations. Applications must be accessible in real time throughout healthcare facilities to enable clinical workflow processes. Storage and delivery of electronic medical records (EMR) and medical images increases the already vital nature of the data center. These business requirements, among others, are compounded by the ongoing pressure to increase patient care and lower costs as a result of the competitive, ageing population, and regulatory forces.

Nexus' Healthcare Practice Provides Core Foundation Services for Success

Leveraging our extensive healthcare experience and history of technical excellence, Nexus has developed Core Foundation Services for Healthcare. Our Core Foundation Services are designed to help healthcare organizations increase the quality of patient care and improve productivity while meeting the security, availability, and resiliency needs of the healthcare industry.

Through our Core Foundation Services, Nexus leverages Advanced Technologies from Cisco and other leading technology and application providers to:

- Enable healthcare providers to collaborate securely in real-time to deliver higher quality patient care
- Provide anywhere, anytime access to information to increase productivity of healthcare workers, improve workflow processes, and provide continuity of care to patients
- Deliver high availability of applications and services to healthcare facilities and campuses
- Ensure application performance leveraging isolation, and quality of service technologies
- Design, deploy, and support strategic data centers to deliver resilient storage and disaster recovery services
- Consolidate customers networks - core, biomedical, security, or other networks - to optimize the deployment, support, and network management cost value

Combining Healthcare and Technical Expertise

Nexus combines strong healthcare experience with leading technical expertise to delivery solutions that increase patient care, enable compliance and increase productivity. We've created strategies and implemented technical designs for over 100 healthcare organizations including hospitals, healthcare campuses, and clinical data centers as well as Cisco's Life Health Connections Clinic.
